

MUKLUK TELEPHONE COMPANY, INC.

TARIFF CHANGES EFFECTIVE: November 12, 2009

LOCAL SERVICE

NOME

In TA 77-253 MTC adds Fractional PRI service to existing ISDN PRI service offerings to local services in its Nome exchange.

- The proposed month to month rate for Basic PRI service remains the same, however the rate elements are combined to reflect one price for the total service. This simplifies the rate applied and reduces potential confusion when Basic PRI service is ordered.
- The term discounts available to PRI subscribers is changed from a 1, 2, and 3 year term to a 1, 3, and 5 year term. The non-recurring charges will be discounted 100% when service is obtained in conjunction with a 3 or 5 year term service commitment. The discounts available have increased to match the current market conditions. There are no customers affected by the change in terms or discounts.
- Fractional PRI is a new service and will be available on a month to month rate and eligible for term contract rates.
- The same terms and discount amounts apply to Fractional PRI as to Basic PRI.

MTC has posted these local service changes in its informational tariff.
